

Requirements Quality and Approval Checklist

Use after the agent drafts candidates and before Copilot updates the controlled register.

1. Evidence

- ☐ Original source is cited.
- ☐ Source is current and accessible.
- ☐ Author or speaker is identified.
- ☐ AI recap is not treated as the original source.

2. Authority

- ☐ Decision rights are known.
- ☐ Policy and decision hierarchy is respected.
- ☐ A stakeholder preference is not labelled as approval.

3. Requirement quality

- ☐ One testable obligation per requirement.
- ☐ Actor, trigger, condition and outcome are clear.
- ☐ Vague words have measurable definitions.
- ☐ Acceptance criteria are supported by evidence.

4. Scope and conflict

- ☐ Requirement is inside the approved MVP boundary.
- ☐ Conflicting evidence remains visible.
- ☐ Out-of-scope ideas are recorded separately.
- ☐ Missing information is labelled Not confirmed.

5. Controlled transfer

- ☐ Decision owner explicitly approves.
- ☐ Exact new row or field delta is defined.
- ☐ Unrelated fields are listed as Preserve.
- ☐ Copilot updates the target file directly.
- ☐ A human verifies changed and unchanged cells.

RELEASE RULE

If any evidence, authority, conflict or approval check fails, the candidate remains Proposed or Blocked and must not enter the approved register.
