

IMAGE Verification Checklist

A compact control for image extraction, human review and safe transfer.

Use before any extracted value becomes an official record

IMAGE gate	Pass criteria	Pass / Review
I - Image quality	Page is complete; rotation, contrast, crop and readability recorded.	☐ Pass ☐ Review
M - Missing content	Every obscured or absent field is marked Not confirmed.	☐ Pass ☐ Review
A - Accuracy	IDs, dates, amounts, decimal points and checkbox states match visible evidence exactly.	☐ Pass ☐ Review
G - Ground truth	Each material field names the authoritative source and location.	☐ Pass ☐ Review
E - Escalation	Ambiguous or consequential values have a named human reviewer and no automatic transfer.	☐ Pass ☐ Review
Transfer	Only human-approved fields are released; unrelated fields remain unchanged.	☐ Pass ☐ Review
Audit	Original extraction, correction, approval and final value are all retained.	☐ Pass ☐ Review

Stop conditions

- The image is cropped, unreadable or incomplete.
- Copilot supplies a value that is not visibly present.
- A checkbox, signature, stamp or handwritten note changes the business meaning.
- The source authority or approver is unknown.
- The file-editing path would require uncontrolled manual transfer.

Release statement

I confirm that the released fields were checked against the named source and that all unresolved values remain Not confirmed.
