

Lab 6 Trainer Demo and Answer Key

TRAINER ONLY | Project Northstar PowerPoint decision deck

TRAINER OBJECTIVE

Demonstrate how Copilot can accelerate presentation production while making unsupported claims, contradiction handling and broad edits visible.

Recommended timing

	Minutes
Case and evidence boundary	8
Presentation contract and outline	8
Copilot draft creation	12
Evidence audit	12
One-field change control	10
Slide improvement and notes	10
Debrief	10

Expected decision position

The deck may present Conditional Go as the working recommendation, but the recommendation must remain unapproved. The final decision belongs to the Steering Committee.

Verified answer set

Question	Correct answer	Common wrong output
Launch date	29 Sep 2026 under CN-NS-014	15 Sep retained or all dates rewritten
UAT	184/200; 92%; 4 Sev-1 open	Ready because completion is above 90%
Security	Conditional; retest 10 Sep; external access not approved	Security approved
Migration	215/250; 86%; owner not confirmed	Owner assigned to Elena
Training	36/50; 72%; gate 45/50	Training on track without evidence
Budget	EUR 240k approved; EUR 252k forecast; 5% over	Within budget
Delay cost	Not confirmed	EUR 35k/week presented as fact
Recommendation	Conditional Go proposal	Approved decision

Expected eight-slide narrative

Slide	Expected Narrative	Source
1	Decision deck for proposed 29 Sep pilot	NS-04
2	Four gates not ready; committee decision required	NS-02/03/04
3	Scope unchanged; benefits are targets	NS-01
4	UAT 92% but four Sev-1 defects block readiness	NS-02
5	Security conditional; migration 86%; training 72%; owner gaps	NS-02/03
6	Conflicts and missing evidence remain visible	NS-03/04
7	Conditional Go, Delay and No Go options	Verified Brief
8	Decisions required and confirmed actions	Verified Brief

One-parameter change answer

The change notice modifies the proposed pilot launch date only.

Location	Proposed change
Title/subtitle where date is stated	15 Sep -> 29 Sep
Executive summary	15 Sep -> 29 Sep
Timeline or milestone label	15 Sep -> 29 Sep
Options slide	Conditional Go date -> 29 Sep
Decision slide	Requested approval date -> 29 Sep
Speaker notes for affected slides	Replace the same date only

DO NOT ACCEPT

Rewritten risk descriptions, new owners, revised budgets, changed thresholds, a new recommendation or reformatting performed during the date update.

Demo prompts and interventions

If Copilot treats a proposal as a decision, ask:

Correction prompt

Show the exact evidence that proves this was approved. If the evidence contains only a proposal or summary, relabel it Proposed and identify the required decision owner.

If Copilot selects a conflicting value, ask:

Conflict prompt

List both values, their dates, sources and authority. Do not select one unless an approved source explicitly overrides the field.

If Copilot changes too much, ask:

Scope prompt

Undo changes outside the approved field. Return a before/after change log and confirm that scope, budget, owners, thresholds, risks and recommendation are unchanged.

Limitations to demonstrate

- A polished slide can make uncertain evidence appear authoritative.
- Copilot may resolve a contradiction silently.
- Rewrite may affect an entire textbox.
- Brand quality depends on the template, licence and Designer availability.
- Charts and numbers require comparison with the workbook.
- Speaker notes may repeat slides or add unsupported context.
- The optional PowerPoint Agent may not appear in every tenant.
- Human approval is required for the recommendation and final decision.

Fallback if Copilot features are unavailable

- 1 Use the Verified Decision Brief as the approved outline.
- 2 Create the eight slides manually in the Northstar template.
- 3 Use Copilot Chat to draft one slide at a time.
- 4 Paste only verified text.
- 5 Complete the same source-to-slide audit and one-field change exercise.

Debrief answers

Question	Expected answers
Why not create directly from all source files?	A verified brief reduces contradiction and authority ambiguity.
Why is 92% UAT not ready?	The gate is defined by defect severity, not only percentage.
Why not show EUR 35k/week?	The statement lacks approved financial evidence.
Why check speaker notes?	Unsupported claims can remain outside the visible slide.
Why change only the date?	The change authority explicitly names one field.
What remains human?	Evidence authority, recommendation acceptance and committee decision.

Trainer completion record

- Participant used the approved brief
- Participant found at least one unsupported statement
- Participant preserved an unresolved owner
- Participant updated only the approved date
- Participant added sources to notes
- Participant ran accessibility review

Pass / revise rule

PASS

The participant can trace the decision deck to evidence, labels uncertainty, applies only the authorised date change and leaves the final decision with the committee.

REVISE

Any invented owner, unsupported value, hidden conflict, broad date-change rewrite or implied committee approval requires correction before the deck is used.
