

Frontier Agent Prompt Card

Project Nova | Researcher • Analyst • Office agents • Cowork

USE RULE

Copy the relevant prompt, attach only approved lab sources and review the output before starting the next handoff.

Researcher — option investigation

COPYABLE PROMPT

Investigate the three Project Nova Phase 2 rollout options using the supplied Decision Brief and Options Source Pack as authoritative internal sources. Add external context only when useful and label it separately. Cite every material claim. Separate confirmed facts, calculated findings, assumptions, conflicts and decisions required. Do not select or approve the final option.

Researcher — challenge the conclusion

COPYABLE PROMPT

Challenge the claim that a technically feasible three-application pilot is sufficient. Show which evidence supports feasibility, which evidence limits business coverage, and which question requires a human decision.

Analyst — profile and analyse

COPYABLE PROMPT

Profile this workbook before calculating KPIs. Identify duplicates, invalid values, missing values, classification conflicts and inconsistent definitions. Calculate request volume by application and the share covered by ready applications. Explain exclusions and denominators. Treat the one-day target as Proposed. Create editable tables and charts.

TRUST — prepare handoff

COPYABLE PROMPT

Create a TRUST handoff: Trace each material claim; Rank source authority; state Uncertainty and conflicts; identify the required human Sign-off; and define exactly what may Transfer to the next agent. Do not release the handoff while a critical issue remains.

Word Agent — decision paper

COPYABLE PROMPT

Using only the approved TRUST handoff, create a two-to-three-page Project Nova decision paper. Preserve citations, Calculated and Proposed labels, conflicts, conditions and human decision ownership. Do not invent a recommendation or record an approval that is absent.

PowerPoint Agent — steering deck

COPYABLE PROMPT

Using the approved decision paper and source map, create a six-slide steering presentation: decision, evidence, Researcher view, Analyst view, options, and decisions required. Keep all figures editable and traceable. Do not change any status or number.

Cowork — stop at approval

COPYABLE PROMPT

Using only approved actions, prepare a follow-up plan with owner, due date, source decision and approval status. Do not send, commit, update or execute consequential actions. Stop and show the approval boundary.
