

Copilot Pages Prompt Card

Copyable prompts for grounding, collaboration, change control and release

Prompt 1 - Grounded weekly update

Using only the attached Project Nova sources, prepare a weekly decision update with these sections: Confirmed facts; Approved decisions; Actions with owner, due date and source; Risks; Proposed changes; Open questions; Source map. Rank the approved Decision Record above status/risk records, named-owner chat corrections, transcript discussion and manager preferences. Preserve 40 users as the approved maximum. Treat 2026-09-15 and 60 users as Proposed unless an approved source says otherwise. Do not infer approval from phrases such as "sounds workable."

Prompt 2 - Page structure

Create a Page called "Project Nova Weekly Decision Page" from the verified response. Keep Confirmed, Calculated, Proposed and Not confirmed visibly separated. Add Source, Authority and Human approval fields for every material decision or change.

Prompt 3 - Controlled collaboration update

Update only the dashboard action owner from Tomas Weber to Sarah Kim, due 2026-09-10, based on the named-owner correction in the post-meeting Teams chat. Record the previous value, new value, source, editor and verification status. Do not change the timeout-test owner or any decision.

Prompt 4 - One-change test

Replace Status Report v4 with approved Status Report v5. Compare the Page claim by claim. Update only values directly changed by the new approved source. List every Page element changed and every protected element left unchanged.

Prompt 5 - Release check

Run a release check on this Page. Identify unsupported claims, missing sources, proposals shown as decisions, owner/date conflicts, access risks and items requiring human sign-off. Do not mark the Page approved.
